

JIMMY CARTER

To Bill Oyster

I am extremely proud of my beautiful new Oyster rod!

During several decades of avid fly-fishing, Rosalynn and I have accumulated a wide range of rods, ranging from those for two-weight to 10-weight lines. They include those made of graphite, boron, and bamboo.

It is obvious to me that this Oyster rod will be my favorite, and you were able to assess personally how well its action suits my casting technique. I was glad that you also were able to observe how the rod performed as several very large rainbows were brought to the net.

The engraving is a special treasure, including the presidential seal on the rod's base.

Thanks, and best wishes,
